THE AUSTRALIAN JOURNAL OF EXPERIMENTAL BIOLOGY AND MEDICAL SCIENCE

VOLUME L

SUBJECT INDEX

Acidosis induced by catecholamines and reduction of cardiovascular responses to catecholamines in acidosis (Atkinson, Dusting and Rand), 847.

Adjuvant action of poly (A:U) on T-cells during the primary immune response *in vitro* (Cone and Marchalonis), 69.

Adrenal autotransplants, the structure and function of (Wright, Blair-West, Coghlan, Denton, Funder, Goding, Nelson and Scoggins), 873.

Agonist-antagonist interaction at the cholinergic receptor of denervated diaphragm (Freeman and Turner), 21.

Alcohol, effect of, on trypsin inhibiting capacity in pancreatic juice (Elmslie and Rao), 217.

Aldosterone, and corticosterone production, the effect of serotonin and potassium on, by isolated zona glomerulosa cells of the rat adrenal cortex (Tait, Tait and Bradley), 833.

Allogeneic leucocytes, adult, interaction of embryonic chicken spleen cells and (Killby, Lafferty and Ryan), 309.

Allogeneic lymphocytes, transferred, the contribution of, to the abrogation of sheep erythrocyte tolerance in rats (McCullagh), 35.

Allogeneic lymphocytes, transferred, the nature of the response of the cells of the sheep erythrocyte-tolerant rat to (McCullagh), 49.

Angiotensin II, the pressor effect of, in pregnant sheep (Blair-West, Coghlan, Denton, Scoggins and Wintour), 739.

Antibodies, homogeneous, the occurrence of, and antigenic selection of κ light chains to streptococcal carbohydrates in Monash rabbits (Herd and Spragg), 225.

Antibody response to SRBC antigen, nude mouse spleen, *in vitro* reconstitution by purified T cells of (Adams), 665.

Antigens in immunity. Antigen localization in congenitally athymic "nude" mice (Mitchell, Pye, Holmes and Nossal), 637.

Antigens, various, of a marsupial *Setonix brachyurus* (quokka), the effect of thymectomy on response to (Stanley, Yadav, Waring and Eadie), 689.

Arterial preparations, isolated, the action of clonidine on (Hodge and Robinson), 517.

Aspirin, the effect of, on the response to endotoxin (Hall, Hodge, Irvine, Katic and Middleton), 589.

Athymic, congenitally, "nude" mice, antigen localization in. Antigens in immunity (Mitchell, Pye, Holmes and Nossal), 637.

Athymic, congenitally, (nude) mice, serum immunoglobulins and antibodies in (Crewther and Warner), 625.

Athymic, congenitally (nude) mouse, surface immunoglobulins on the thoracic duct lymphocytes of the (Bankhurst and Warner), 661.

Auerbach's plexus, preliminary studies of the neurones of, using intracellular microelectrodes (Holman, Hirst and Spence), 795.

Autoimmune disease, a reassessment of the forbidden clone hyopthesis of (Burnet), 1.

Blood chemistry and gastro-intestinal changes in the developing red kangaroo (*Megaleia rufa*, Desmarest) (Harrop and Barker), 245.

Blood pressure in sheep, the effect of prolonged salt intake on (Potter), 387.

Book reviews, 123, 251, 395, 541, 669, 781.

Bovine polymeric Hb binding protein, preliminary characterization of the, and comparison of some properties with human haptoglobins (Goodger), 11.

Breathing, liquid, *see* Liquid breathing.

Bunamidine uptake and distribution in rats and dogs (Virji and Laverty), 209.

Calves, absorption and endogenous production of immunoglobulins in (Husband, Brandon and Lascelles), 491.

Cancers, carcinoma, melanoma, sarcoma, of haematopoietic tissues, serum transferrin and ceruloplasmin concentrations in (Hughes), 97.

Carbohydrate, and lipid metabolism, studies on, in the rat. Effects of diet on body composition, plasma glucose and insulin concentrations, insulin secretion *in vitro* and tolerance to intravenous glucose and intravenous insulin (Hoffmann, Carroll and Goldrick), 267.

Carbohydrate, and lipid metabolism, studies on, in the rat. Effects of diet on the metabolism and the responses *in vitro* to insulin of epididymal adipose tissue and hemidiaphragms (Goldrick, Hoffmann and Reardon), 289.

Cardiac output, redistribution of, during liquid breathing in the newborn rabbit (Walker, Petrovic, Ponitch and Ritchie), 467.

Catecholamines, acidosis induced by, and reduction of cardiovascular responses to catecholamines in acidosis (Atkinson, Dusting and Rand), 847.

Catecholamines, inhibition of the release of the neurohypophysial hormones of rats by, *in vitro* (Yeo, Lockett and Heller), 527.

Cell classes, different, the separation of, from lymphoid organs. The effect of pH on the buoyant density of lymphocytes and erythrocytes (Williams and Shortman), 133.

Cell classes, different, the separation of, from lymphoid organs. The relationship between the adherence properties and the buoyant density of sub-populations of "B" and "T" lymphocytes (Shortman, Byrd, Williams, Brunner and Cerottini), 323.

Cell culture, conditions for growth of an ovine *Chlamydia* (*Bedsonia*) in, (Harris), 447.

Cellular migration and mitotic indices in primary explants of tracheal epithelium, differential effect of serum supplements on (Painter), 769.

Cellular pathology, impression-expression reactions in (Finckh), 259.

Ceruloplasmin and transferrin concentrations, serum, in patients with carcinoma, melanoma, sarcoma and cancers of haematopoietic tissues (Hughes), 97.

Chlamydia (*bedsonia*), an ovine, conditions for growth of, in cell culture (Harrison), 447.

Cholesterol metabolism in male and female rabbits, differential effect of piperazine on (Redgrave and West), 153.

Cholinergic receptor of denervated diaphragm, agonist-antagonist interaction at the (Freeman and Turner), 21.

Clone hypothesis, the forbidden, of autoimmune disease, a reassessment of (Burnet), 1.

Clonidine, the action of, on isolated arterial preparations (Hodge and Robinson), 517.

Colony forming efficiency in agar suspension cultures, factors determining (Bradley, Fry, Sumner and McInerney), 813.

Colony stimulating factor (CSF) (Metcalf), 547.

Complement fixing antigens, *Mycoplasma mycoides* var. *mycoides*, the chemical nature of (Buttery), 567.

Conjugational ability, increased, a mutant of *Pseudomonas aeruginosa* with (Pemberton and Holloway), 577.

Contraction of the sheep's spleen (Dooley, Hecker and Webster), 745.

Corticosterone and aldosterone production, the effect of serotonin and potassium on, by isolated zona glomerulosa cells of the rat adrenal cortex (Tait, Tait and Bradley), 833.

CSF, *see* Colony stimulating factor.

Cultures, agar suspension, factors determining colony forming efficiency in (Bradley, Fry, Sumner and McInerney), 813.

Denervated diaphragm, agonist-antagonist interaction at the cholinergic receptor of (Freeman and Turner), 21.

Ducks, unanaesthetized, the flow and cellular composition of cervical lymph from (Bell and Lafferty), 611.

Ear chamber, rabbit, *in vivo* observations on plasma cells in the (Cliff), 499.

Embryonic chicken spleen cells and adult allogeneic leucocytes, interaction of (Killby, Lafferty and Ryan), 309.

Embryos, chick, ouabain-induced growth retardation and death in (Edwards, Gupta and Harley), 773.

Embryos, chicken, the pathogenesis of the graft-versus-host reaction in. Pathological changes in the yolk sac, thymus, bone marrow and bursa of Fabricius (Walker, Schoefl and Lafferty), 675.

Endotoxin, the effect of aspirin on the response to (Hall, Hodge, Irvine, Katic and Middleton), 589.

Erythrocytes, lens and liver, species variation in galactokinase activity of (Gupta, Irvine and Harley), 511.

Fish swimbladder, the mechanism of secretion of inert gases into the (Abernethy), 365.

Fimbriae, *see* Pili.

G cells, distribution of, in the canine gastrointestinal tract (Hansky, McNaughtan and Nairn), 391.

Galactokinase activity of erythrocytes, lens and liver, species variation in (Gupta, Irvine and Harley), 511.

Gastro-intestinal changes, and blood chemistry, in the developing red kangaroo (*Megaleia rufa* Desmarest) (Harrop and Barker), 245.

Gastrointestinal tract, canine, the distribution of G cells in the (Hansky, McNaughtan and Nairn), 391.

Glomerular basement membrane, rat, silver deposition in (Ham and Tange), 423.

Glutathione and tissue nucleotides, changes in levels of, after hyperbaric oxygen treatment (Willis and Kratzing), 725.

Glyceryl-1-monoether, absorbed, the effect of micellar solubilization on mucosal metabolism of (Hoffman, Simmonds and Morgan), 803.

Graft-versus-host reaction in chicken embryos, the pathogenesis of the. Pathological changes in the yolk sac, thymus, bone marrow and bursa of Fabricius (Walker, Schoefl and Lafferty), 675.

Growth hormone levels, plasma human, in response to meals: a reappraisal (Baker, Best, Burger and Cameron), 715.

Growth retardation and death in chick embryos, ouabain-induced (Edwards, Gupta and Harley), 773.

Guinea-pig, the effect of ingestion of *Swainsona galegifolia* on the liver lysosomes of the (Huxtable), 109.

GvHR, *see* Graft-versus-host reaction.

Haptoglobins, human, preliminary characterization of the bovine polymeric Hb binding protein and comparison of some properties with (Goodger), 11.

Hormonal factors influencing salt appetite in lactation (Shulkes, Covelli, Denton and Nelson), 819.

Humoral and cell mediated responses *in vitro* of spleen cells from mice with thymic aplasia (nude mice) (Feldmann, Wagner, Basten and Holmes), 651.

Hypogonadotrophic hypogonadism, partial: studies of pituitary function and of the pituitary-testicular relationship in two patients (Baker, Burger, Hudson and De Kretser), 861.

Immune response of the lizard, *Tiliqua rugosa* (Wetherall and Turner), 79.

Immune response, the primary, *in vitro*, adjuvant action of poly (A:U) on T-cells during (Cone and Marchalonis), 69.

Immune responses in intestinal tissues to particulate antigens. Plaque-forming and rosette-forming cell responses in rats (Robertson and Cooper), 703.

Immune responses, the thymus glands of a marsupial, *Setonix brachyurus* (quokka) and their role in. Effect of thymectomy on somatic growth and blood leucocytes (Yadav, Stanley and Waring), 357.

Immune responses, the thymus glands of a marsupial, *Setonix brachyurus* (quokka) and their role in. Structure and growth of the thymus glands (Yadav, Stanley and Waring), 347.

Immunity, antigens in. Antigen localization in congenitally athymic "nude" mice (Mitchell, Pye, Holmes and Nossal), 637.

Immunoglobulin, concentrations of, in mammary secretion of ruminants during involution, with particular reference to selective transfer of IgG_1 (Watson, Brandon and Lascelles), 535.

Immunoglobulins, absorption and endogenous production of, in calves (Husband, Brandon and Lascelles), 491.

Immunoglobulins and antibodies, serum, in congenitally athymic (nude) mice (Crewther and Warner), 625.

Immunoglobulins, surface, metabolic turnover of, on B and T lymphocytes (Wilson), 199.

Immunoglobulins, surface, on the thoracic duct lymphocytes of the congenitally athymic (nude) mouse (Bankhurst and Warner), 661.

Immunological suppression of parasite rejection by removal of selected lymphocyte populations: the effect of neonatal thymectomy and anti-thymocyte serum administration on the resistance of rats to infection with the nematode *Nippostrongylus brasiliensis* (Kelly), 477.

Impression-expression reactions in cellular pathology (Finckh), 259.

Inert gases in the kidney: influence of the countercurrent multiplication of sodium (Abernethy), 375.

Inert gases, the mechanism of secretion of, into the fish swimbladder (Abernethy), 365.

Instructions to authors, 129, 257, 401, 546, 674, 786.

Intestinal tissues, immune responses in, to particulate antigens. Plaque-forming and rosette-forming cell responses in rats (Robertson and Cooper), 703.

Kangaroo, red (*Megaleia rufa*, Desmarest), developing, blood chemistry and gastro-intestinal changes in the (Harrop and Barker), 245.

Kidney, inert gases in the: influence of the countercurrent multiplication of sodium (Abernethy), 375.

Lactation, hormonal factors influencing salt appetite in (Shulkes, Covelli, Denton and Nelson), 819.

Leucocytes from intact and thymectomized quokkas, the *in vitro* response to phytohaemagglutinin (PHA) of (Ashman, Keast, Stanley and Waring), 337.

Lipid and carbohydrate metabolism, studies on, in the rat. Effects of diet on body composition, plasma glucose and insulin concentrations, insulin secretion *in vitro* and tolerance to intravenous glucose and intravenous insulin (Hoffmann, Carroll and Goldrick), 267.

Lipid and carbohydrate metabolism, studies on, in the rat. Effects of diet on the metabolism and the response *in vitro* to insulin of epididymal adipose tissue and hemidiaphragms (Goldrick, Choo and Reardon), 289.

Lipid absorption, the role of micellar solubilization in (Simmonds), 403.

Liquid breathing in the newborn rabbit, redistribution of cardiac output during (Walker, Petrovic, Ponitch and Ritchie), 467.

Lizard, *Tiliqua rugosa*, immune response of the (Wetherall and Turner), 79.

Lymph, cervical, from unanaesthetized ducks, the flow and cellular composition of (Bell and Lafferty), 611.

Lymphocytes, a micromethod for stimulation of, by phytohaemagglutinin (Keast and Bartholomaeus), 603.

Lymphocytes, B and T, metabolic turnover of surface immunoglobulins on (Wilson), 199.

Lymphocytopenia, prolonged, in the rat. The depletion of blood and thoracic duct lymphocyte populations following injection of β-emitting colloids into the spleen or lymph nodes (Roser and Ford), 165.

Lymphocytopenia, prolonged, in the rat. The immunological consequences of lymphocyte depletion following injection of ^{185}W tungsten trioxide into the spleen or lymph nodes (Roser and Ford), 185.

Lymphoid organs, the separation of different cell classes from. The effect of pH on the buoyant density of lymphocytes and erythrocytes (Williams and Shortman), 133.

Lymphoid organs, the separation of different cell classes from. The relationship between the adherence properties and the buoyant density of sub-populations of "B" and "T" lymphocytes (Shortman, Byrd, Williams, Brunner and Cerottini), 323.

Lysosomes, liver, of the guinea-pig, the effect of ingestion of *Swainsona galegifolia* on (Huxtable), 109.

Malnutrition, maternal, the effect of, on the progeny in the rat. Studies on growth, body composition and organ cellularity in first and second generation progeny (McLeod, Goldrick and Whyte), 435.

Malnutrition, maternal, the effect of, on the progeny in the rat. Studies on nitrogen balance (McLeod, Goldrick and Whyte), 731.

Mammary secretion of ruminants during involution, concentrations of immunoglobulin in, with particular reference to selective transfer of IgG_1 (Watson, Brandon and Lascelles), 535.

Maternal malnutrition, *see* Malnutrition, maternal.

Meals, plasma human growth hormone levels in response to: a reappraisal (Baker, Best, Burger and Cameron), 715.

Megaleia rufa, Desmarest, *see* Kangaroo, red.

Metabolic turnover of surface immunoglobulins on B and T lymphocytes (Wilson), 199.

Metabolism, lipid and carbohydrate, *see* Lipid and carbohydrate metabolism.

Mice, congenitally athymic "nude", *see* Athymic, congenitally, "nude" mice.

Mice with thymic aplasia (nude mice), humoral and cell mediated responses *in vitro* of spleen cells from (Feldmann, Wagner, Basten and Holmes), 651.

Micellar solubilization, *see* Solubilization, micellar.

Micromethod for stimulation of lymphocytes by phytohaemagglutinin (Keast and Bartholomaeus), 603.

Mitotic indices, and cellular migration in primary explants of tracheal epithelium, differential effect of serum supplements on (Painter), 769.

Monash rabbits, *see* Rabbits, Monash.

Monoamine oxidase, extraneuronal, in the rabbit ear artery, evidence for inactivation of noradrenaline by (De la Lande and Johnson), 119.

Mucosal metabolism of absorbed glyceryl-1-monoether, the effect of micellar solubilization on (Hoffman, Simmonds and Morgan), 803.

Mycoplasma mycoides var. *mycoides* complement fixing antigens, the chemical nature of (Buttery), 567.

Neurohypophysial hormones of rats, inhibition of the release of the, by catecholamines *in vitro* (Yeo, Lockett and Heller), 527.

Neurones of Auerbach's plexus, preliminary studies of the, using intracellular microelectrodes (Holman, Hirst and Spence), 795.

Noradrenaline, evidence for inactivation of, by extraneuronal monoamine oxidase in the rabbit ear artery (De la Lande and Johnson), 119.

Nucleolus, a new function for the (Harris), 827.

Nucleotides, tissue, and glutathione, changes in levels of, after hyperbaric oxygen treatment (Willis and Kratzing), 725.

"Nude" mice, congenitally athymic, *see* Athymic, congenitally, "nude" mice.

Nude mouse spleen antibody response to SRBC antigen, *in vitro* reconstitution by purified T cells of (Adams), 665.

Ouabain-induced growth retardation and death in chick embryos (Edwards, Gupta and Harley), 773.

Oxygen treatment, hyperbaric, changes in levels of tissue nucleotides and glutathione after (Willis and Kratzing), 725.

Pancreatic juice, effect of alcohol on trypsin inhibiting capacity in (Elmslie and Rao), 217.

Parasite rejection, immunologic suppression of, by removal of selected lymphocyte populations: the effect of neonatal thymectomy and anti-thymocyte serum administration on the resistance of rats to infection with the nematode, *Nippostrongylus brasiliensis* (Kelly), 477.

Pathogenesis of the graft-versus-host reaction in chicken embryos. Pathological changes in the yolk sac, thymus, bone marrow and bursa of Fabricius (Walker, Schoefl and Lafferty), 675.

Phytohaemagglutinin, a micromethod for stimulation of lymphocytes by (Keast and Bartholomaeus), 603.

Phytohaemagglutinin (PHA) of leucocytes from intact and thymectomized quokkas, the *in vitro* response to (Ashman, Keast, Stanley and Waring), 337.

Pili (fimbriae) of *Pseudomonas aeruginosa*, the structure and isolation of (Weiss and Raj), 559.

Piperazine, differential effect of, on cholesterol metabolism in male and female rabbits (Redgrave and West), 153.

Pituitary function, studies of, and of the pituitary-testicular relationship in two patients: partial hypogonadotrophic hypogonadism (Baker, Burger, Hudson and De Kretser), 861.

Plasma cells, *in vivo* observations on, in the rabbit ear chamber (Cliff), 499.

Plasma protein metabolism during pregnancy in the rabbit (Morgan), 777.

Poly (A:U), adjuvant action of, on T-cells during the primary immune response *in vitro* (Cone and Marchalonis), 69.

Polyadenylic and polyuridylic acids, *see* Poly (A:U).

Potassium and serotonin, the effect of, on corticosterone and aldosterone production by isolated zona glomerulosa cells of the rat adrenal cortex (Tait, Tait and Bradley), 833.

Potassium tolerance in rats (Adam and Dawborn), 757.

Pregnancy in the rabbit, plasma protein metabolism during (Morgan), 777.

Pregnant sheep, the pressor effect of angiotensin II in (Blair-West, Coghlan, Denton, Scoggins and Wintour), 739.

Pressor effect of angiotensin II in pregnant sheep (Blair-West, Coghlan, Denton, Scoggins and Wintour), 739.

Progeny in the rat, the effect of maternal malnutrition on the. Studies on growth, body composition and organ cellularity in first and second generation progeny (McLeod, Goldrick and Whyte), 435.

Progeny in the rat, the effect of maternal malnutrition on the. Studies on nitrogen balance (McLeod, Goldrick and Whyte), 731.

Pseudomonas aeruginosa, a mutant of, with increased conjugational ability (Pemberton and Holloway), 577.

Pseudomonas aeruginosa, the structure and isolation of pili (fimbriae) of (Weiss and Raj), 559.

Quokka, *Setonix brachyurus*, a marsupial, the thymus glands of, and their role in immune responses. Effect of thymectomy on somatic growth and blood leucocytes (Yadav, Stanley and Waring), 357.

Quokka, *Setonix brachyurus*, a marsupial, the thymus glands of, and their role in immune responses. Structure and growth of the thymus glands (Yadav, Stanley and Waring), 347.

Quokka, *Setonix brachyurus*, marsupial, the effect of thymectomy on response to various antigens of a (Stanley, Yadav, Waring and Eadie), 689.

Quokkas, intact and thymectomized, the *in vitro* response to phytohaemagglutinin (PHA) of leucocytes from (Ashman, Keast, Stanley and Waring), 337.

Rabbit, plasma protein metabolism during pregnancy in the (Morgan), 777.

Rabbits, Monash, the occurrence of homogeneous antibodies and antigenic selection of κ light chains to streptococcal carbohydrates in (Herd and Spragg), 225.

Rat, the effect of maternal malnutrition on the progeny in the. Studies on growth, body composition and organ cellularity in first and second generation progeny (McLeod, Goldrick and Whyte), 435.

Rat, the effect of maternal malnutrition on the progeny in the. Studies on nitrogen balance (McLeod, Goldrick and Whyte), 731.

Rats, potassium tolerance in (Adam and Dawborn), 757.

Salt appetite in lactation, hormonal factors influencing (Shulkes, Covelli, Denton and Nelson), 819.

Salt intake, prolonged, the effect of, on blood pressure in sheep (Potter), 387.

Serotonin and potassium, the effect of, on corticosterone and aldosterone production by isolated zona glomerulosa cells of the rat adrenal cortex (Tait, Tait and Bradley), 833.

Serum supplements, differential effect of, on cellular migration and mitotic indices in primary explants of tracheal epithelium (Painter), 769.

Setonix brachyurus, *see* Quokka.

Sheep erythrocyte tolerance in rats, the contribution of transferred allogeneic lymphocytes to the abrogation of (McCullagh), 35.

Sheep erythrocyte-tolerant rat, the nature of the response of the cells of the, to transferred allogeneic lymphocytes (McCullagh), 49.

Sheep, the effect of prolonged salt intake on blood pressure in (Potter), 387.

Silver deposition in rat glomerular basement membrane (Ham and Tange), 423.

Sodium, influence of the countercurrent multiplication of: inert gases in the kidney (Abernethy), 375.

Solubilization, micellar, the effect of, on mucosal metabolism of absorbed glyceryl-1-monoether (Hoffman, Simmonds and Morgan), 803.

Solubilization, micellar, the role of, in lipid absorption (Simmonds), 403.

Species variation in galactokinase activity of erythrocytes, lens and liver (Gupta, Irvine and Harley), 511.

Spleen, sheep's, contraction of the (Dooley, Hecker and Webster), 745.

Streptococcal carbohydrates in Monash rabbits, the occurrence of homogeneous antibodies and antigenic selection of κ light chains to (Herd and Spragg), 225.

Structure and isolation of pili (fimbriae) of *Pseudomonas aeruginosa* (Weiss and Raj), 559.

Swainsona galegifolia, the effect of ingestion of, on the liver lysosomes of the guinea-pig (Huxtable), 109.

Thymectomy, the effect of, on response to various antigens of a marsupial *Setonix brachyurus* (quokka) (Stanley, Yadav, Waring and Eadie), 689.

Thymic aplasia, mice with, (nude mice), humoral and cell mediated responses *in vitro* of spleen cells from (Feldmann, Wagner, Basten and Holmes), 651.

Thymus glands of a marsupial *Setonix brachyurus* (quokka) and their role in immune responses. Effect of thymectomy on somatic growth and blood leucocytes (Yadav, Stanley and Waring), 357.

Thymus glands of a marsupial, *Setonix brachyurus* (quokka), and their role in immune responses. Structure and growth of the thymus glands (Yadav, Stanley and Waring), 347.

Tiliqua rugosa, *see* Lizard.

Transferrin and ceruloplasmin concentrations, serum, in patients with carcinoma, melanoma, sarcoma and cancers of haematopoietic tissues (Hughes), 97.

Trypsin inhibiting capacity in pancreatic juice, effect of alcohol on (Elmslie and Rao), 217.

Wright, Professor R. D., to honour (Rowley), 788.
